SECURITY OUTCOMES :  
How military spending changes relate to peace and terrorism | Global analysis, 2020–2025

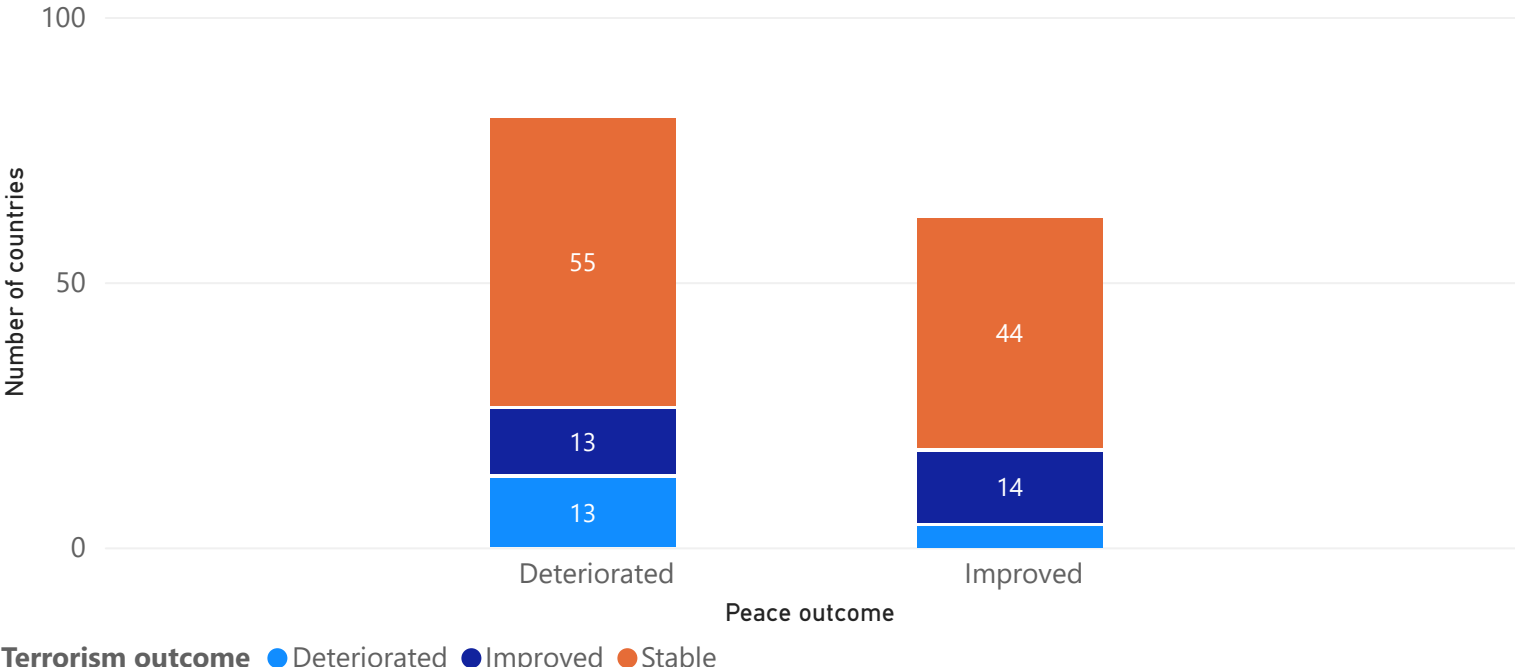

SECURITY OUTCOME PROFILES

Countries grouped by peace and terrorism outcomes, 2020–2025

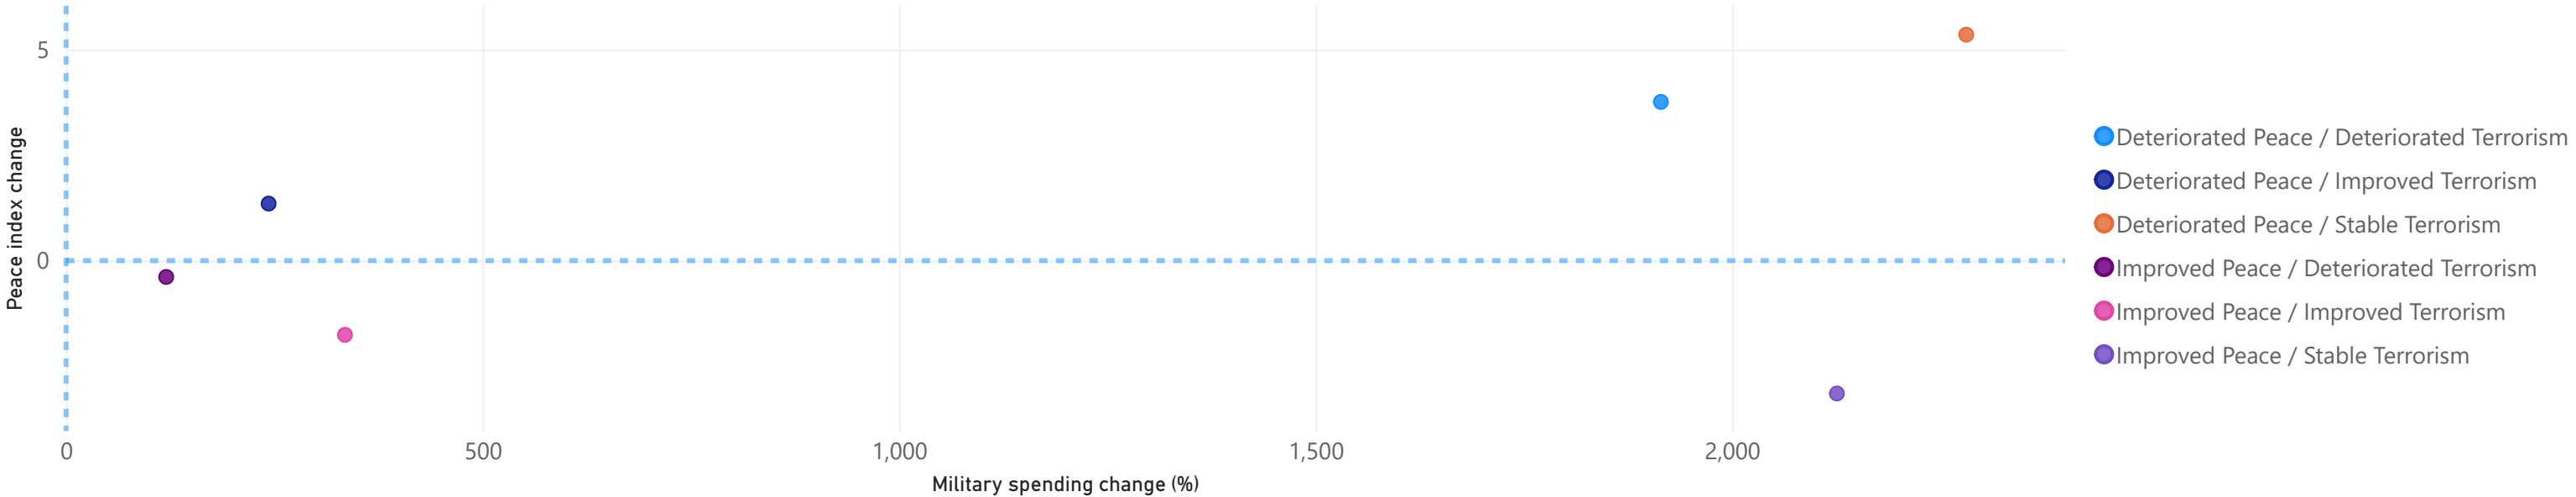

PEACE AND TERRORISM OUTCOMES

Number of countries by peace outcome and terrorism trend, 2020–2025

DOES MORE MILITARY SPENDING MEAN MORE PEACE?

Military spending change vs. peace change, 2020–2025

KEY INSIGHT

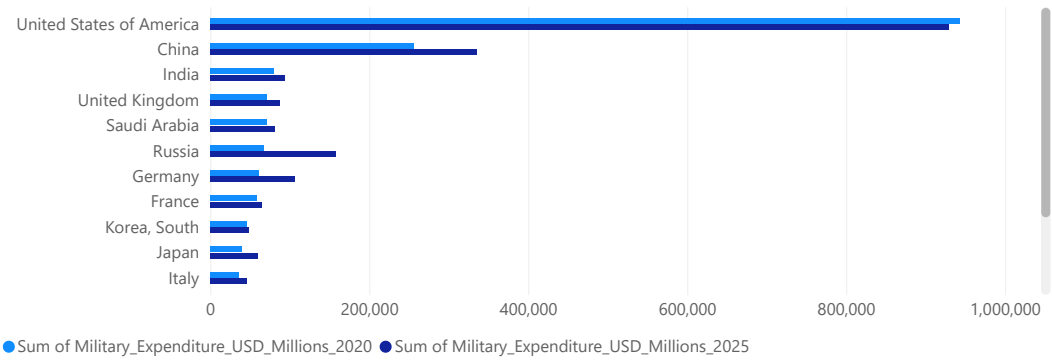

The relationship between military spending and peace is not consistently positive. Countries with increased military spending show mixed peace outcomes, suggesting that higher defense expenditure alone does not guarantee improved peace.

# MILITARY INVESTMENT

## Global military spending patterns and major changes | 2020–2025

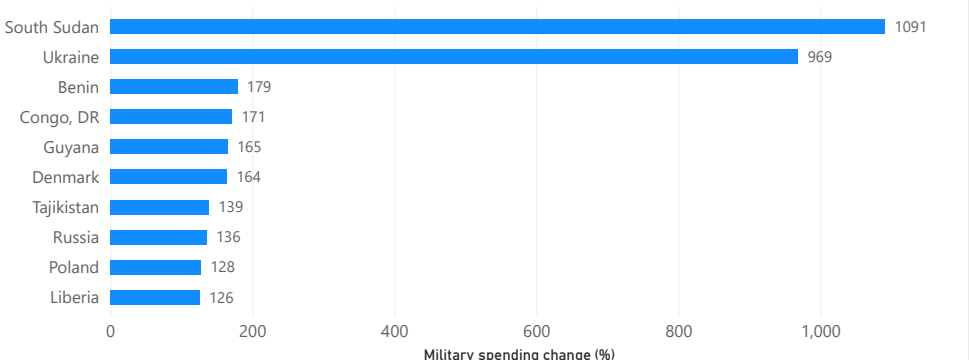

### Military expenditure (USD millions)

Top 15 military spenders by 2025 expenditure.

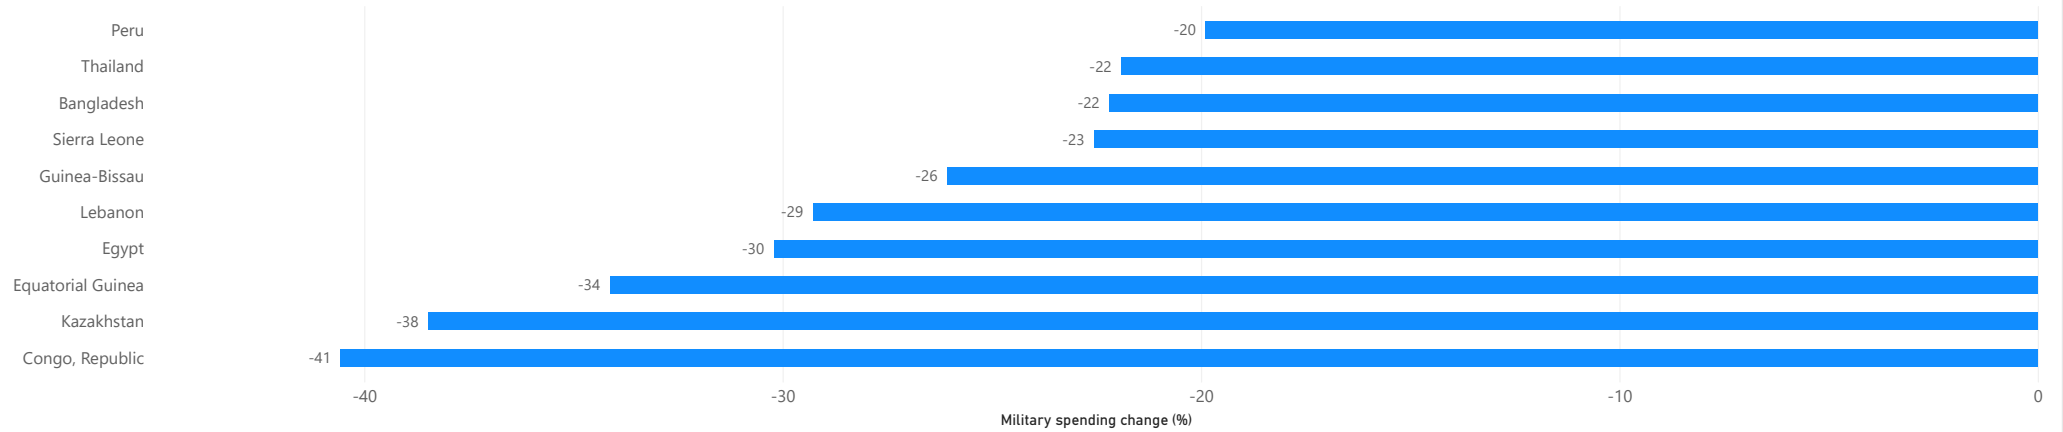

### BIGGEST MILITARY SPENDING INCREASES

Top 10 countries by percentage increase, 2020–2025

### BIGGEST MILITARY SPENDING DECREASES

Bottom 10 countries by percentage change, 2020–2025

### KEY INSIGHT

Military spending is highly concentrated among a small number of countries, while percentage changes vary substantially across nations. Large increases in spending are not limited to the world's largest military spenders.
